

Incite Plus

A Plant Growth Regulator For Use on Field Crops, Fruits, Tree Nuts, Vegetables, Herbs and Spices, Forage Grasses and Non-Food Crops such as Ornamentals, Trees and Turf

ACTIVE INGREDIENTS:

Cytokinin, as Kinetin.....	0.09%
Gibberellic Acid (GA ₃)	0.05%
Indole-3-Butyric Acid (IBA)	0.05%
OTHER INGREDIENTS:	<u>99.81%</u>
TOTAL:	100.00%

Incite is a bio-stimulant used as a yield enhancing supplement with plant nutrients. Incite enhances cell division, cell differentiation, cell enlargement, root growth and nutrient utilization.

Incite is especially effective when applied with fertilizers and is compatible with most pesticides.

Incite is used extensively as a Foliar additive to fertilizer and can be impregnated into dry fertilizer.

Incite is packed with a blend of cytokinins, auxins, and Gibberellic Acid (a natural synergists) that increase root mass by stimulating new root growth, not just by fattening and elongating existing roots (an important distinction).

Incite is an EPA registered hormone biostimulant. EPA registration assures you that every jug of Incite contains the same amount of active ingredient.

Incite Your Plants

By using **Incite** the normal functioning of a plant's hormonal systems is insured and enhanced, an essential factor in the healthy growth and development.

EPA Reg. No. 80518-3

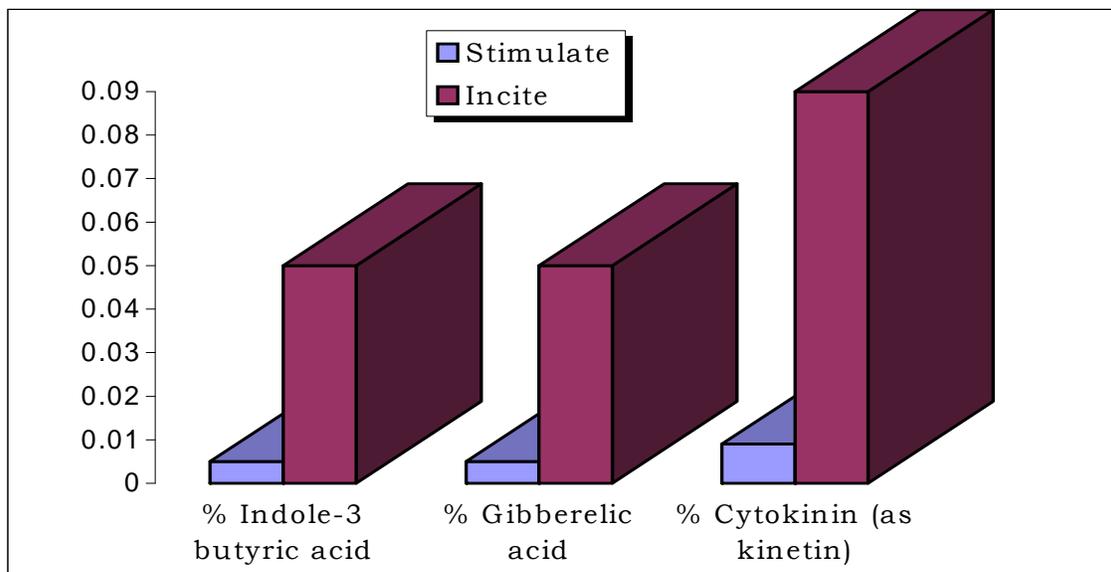

EPA Est. No. 80518-TX-001

Manufactured By:

CytoTek Enterprises, Inc.
25414 Sugar Valley Lane
Spring, TX 77373

**Why pay more for less?
Compare Incite to Stimulate**

Why pay more for less? Incite offers more root building power per dollar than any other biostimulant on the market.

Benefits of CATALYSTPLUS:

- Increased yield
- Enhanced nutrient uptake & utilization
- Improved flower retention & fruit
- Improved fruit size & quality
- Improved stress resistance
- Increased vigor
- Improves Salinity Tolerance
- Retards Turf Senescence
- Increased Fertilizer Efficiency
- Effective on all plants and trees
- Easy on the Budget
